

HERBADEN Spa®

SPA & WELLNESS LINE

Therapeutic herbal bath additives for balneology and wellness

The new dimension of whirlpool, pearl and traditional baths in spas and wellness centers.

HERBADEN Spa® herbal bath additives were specially developed for spa facilities treating mobility disorders to be used in whirlpool, pearl and traditional baths. However, they soon became popular not only with spa clients but also with hotel guests who underwent the herbal whirlpool bath procedure. HERBADENT Spa® baths contain a highly concentrated extract of 6 herbal drugs (willow bark, hop cones, nettle, lavender, mint, and chamomile) enriched with Dead Sea salt and natural herbal oils (mountain pine, lavender, lemongrass, and mint) which ensure specific properties, especially fragrance (a natural aroma) of every bath.

The HERBADEN Spa® herbal additives are manufactured from extracts and oils of clinically tested mixture of 7 medicinal herbs (willow bark, hop cones, nettle, lavender, mint, and chamomile) which have relaxation effects on the musculoskeletal apparatus and the entire body and provide muscle tension relief. The formula is based on the authorized product Calmonal, which has been used in many spas in therapeutic procedures for over 20 years.

HERBADEN Spa®

herbal bath additives

The HERBADEN Spa® baths are characterized by a high content of medicinal herbal extracts (up to 85%), which is produced by a slow extraction of herbs for 4 to 6 weeks, when active substances are released from medicinal herbs. All baths are manufactured in pharmaceutical-grade quality in accordance with ISO 9001.

Natural medicinal herbal wines Maltoferrochin® and Condurango®

Maltoferrochin® - iron-rich wine for effective iron supplementation.

A natural malt wine enriched by a ferrous-ferric complex combined with quinine bark extract, leads to easy absorption of iron in the body.

Condurango® - a digestive product for better digestion in the event of feeling full and pressure in the area of stomach and in digestion disorders. Extract of the pharmacopoeia tropical herb Marsdenia Condurango calms and stimulates the stomach.

The wines are manufactured without chemical preservatives.

VINUM MEDICINALE

History of the firm with a hundred-year tradition

AURA Medical s.r.o., Medicinal Herb Division, is a traditional pharmaceutical manufacturer of phytopharmaceutical products, food supplements, and cosmetic products.

It is based on a more than 100-year tradition of natural medicinal wines Maltoferrochin® and Condurango®, which have been manufactured in the premises of the firm since the year 1897 and for many years they were the main product of the founder Dr. SVÁTEK and the firm SVÁTEK A SPOL. PRAHA – SMÍCHOV, První kvasírny a sklepy maltonových vín [Premiere Malt Wine Fermentation House and Vaults].

Today the firm LÉČIVÉ ROSTLINY is a part of the company AURA Medical s.r.o., one of the biggest suppliers of medical devices in the Czech Republic, and holder of ISO 9001 and GMP certificates. In its production program, the company offers products manufactured from medicinal herb extracts: proven and popular products **Herbadent®**, **Herbaden Spa®**, **Maltoferrochin®** and **Condurango®**

We offer health from pure nature. The strength of our products originates mainly from Central European medicinal herbs, manufactured according to traditional prescriptions. Our products contain a high percentage of herbal extracts and oils.
